

Yogesh Dhotre

✉ yogeshdhotre.tech@gmail.com ☎ 8087837769 📍 Ahmednagar, Maharashtra

Summary

Cloud enthusiast and BCA final-year student with practical experience designing AWS infrastructure using EC2, VPC, RDS, and Load Balancer. Strong understanding of Linux server management and networking fundamentals. Focused on building real-world cloud projects and preparing for entry-level Cloud/DevOps roles.

Education

B.C.A, New Arts Commerce And Science Collage 07/2023 – Present
Ahmednagar

Skills

Cloud:

AWS (EC2, S3, VPC, RDS, IAM, Security Groups, ALB, Auto Scaling)

Operating System:

Linux (User management, permissions, SSH, networking, package management)

Networking:

TCP/IP, Subnetting, CIDR, OSI Model, Ports & Protocols

Git&Github

Projects

Auto Scaling & Load Balancer Implementation on AWS

- Designed and deployed highly available web application architecture using Application Load Balancer and Auto Scaling Group.
- Created Launch Template for EC2 instances with pre-installed Apache web server.
- Configured Auto Scaling Group with minimum (1), desired (1), and maximum (3) instance capacity.
- Implemented dynamic scaling policy based on CPU utilization threshold (70%).
- Attached Target Group to Load Balancer with health check configuration.
- Demonstrated automatic instance scaling during simulated traffic load.
- Ensured high availability across multiple Availability Zones.

AWS 3-Tier Architecture Deployment

- Designed and deployed a highly available 3-tier web application architecture on AWS.
- Configured VPC with public and private subnets across multiple Availability Zones.
- Launched EC2 instances in public subnet behind Application Load Balancer.
- Deployed RDS MySQL database in private subnet for enhanced security.
- Implemented Security Groups and NACLs for controlled access.
- Used NAT Gateway for private subnet internet access.
- Achieved secure and scalable cloud infrastructure setup.
